RE: Building 4A Implementation Plan

Dear Mr. Craig:

The United States Environmental Protection Agency (U.S. EPA) has completed its review of the Change to the Operable Unit (OU) 3 Building 4A Implementation Plan for Above-Grade Decontamination and Dismantlement (D and D). The existing monitoring program includes the current site-wide monitoring program and a supplemental radiological air monitoring program specifically designed for the D and D of building 4A.

The proposed change includes installing seven continuous air monitoring stations rather than eight. This change will not impact the ability of the monitoring program to meet its objectives.

Therefore, U.S. EPA concurs with the change.

Please contact me at (312) 886-0992 if you have any questions.

Sincerely,

James A. Saric
Remedial Project Manager
